

Emmanuel Asuquo

Backend Software Engineer (Node.js)

Lagos, Nigeria • +2348097625072 • emmanueldan0920@gmail.com • <https://www.linkedin.com/in/emmanuel-asuquo-60381a1a6>

I am a web developer with a good understanding of designing and building for the needs of the end user. A passion for self-improvement and learning new things, a passion for perfection and desire to create something unique. I'm well-versed in a wide range of computer programming languages. I am highly proficient at writing backend codes and conversant with working with a database.

WORK EXPERIENCE

Coding and Robotics Lead Instructor

May 2021 – Present

Alobe Associates, Lagos, Nigeria.

Promoted to Lead Instructor after increasing the number of signups in 3 schools. Co-Led the instructors incharge of training new interns and trained 7 interns.

- Led the S.T.E.M team in an exhibition and generated a lot of interest in the company.
- Drafted and developed about 30 projects for the company's coding and robotics curriculum.
- Managed the coding team assigned to a school.

Co-Founder & Instructor

November 2022 – Present

Design & Code Tech (DeCT), Lagos, Nigeria.

Co-Founded the company and also part of the instructors. Taught a score of kids online and mentoring about 5 youths transitioning into Tech.

- Assisted the design team in designing the Company's Logo and Flyers.
- Co-led the design and coding team in schools.
- Managed the Company's social media presence.

EDUCATION

Diploma – Software Engineering

April 2022 – March 2023

AltSchool Africa School of Engineering, Lagos, Nigeria.

PROJECTS

Blogging Api

Technologies: Node.js • Express (express.js) • MongoDB • Mongoose.

This an api for a Blog App built as an exam project by me, a Backend Engineering student at AltSchool Africa School of Engineering 2022/23.

Jesus Sanctuary Website

Technologies: HTML • CSS • JavaScript • Responsive design

Jesus Sanctuary Website is a website template made for a church just for social media presence and it's still under maintenance. It's also responsive on all screen types.

Yummy-Xpress

Technologies: HTML • CSS • JavaScript • jQuery • Responsive design

Yummy-Xpress is an imaginary restaurant website for making online orders. It was my first web project made with HTML/CSS. It's also responsive on all screens

Portfolio

Technologies: HTML • CSS • JavaScript • AOS • Responsive design

This project is the first version of my portfolio website. It's responsive on all screens and also contains graphical versions of my web projects.
